## Microsoft Dynamics Integration

## 100% Cloud - Customer Experience Platform

Use the advanced **BeInContact solution integrated with Microsoft Dynamics** to develop the most suitable **communication strategy** for your company.

Microsoft Dynamics 365 is a cloud customer relationship management (CRM) solution running on Microsoft Azure. Dynamics 365 uses a suite of business applications connected through a common Microsoft cloud platform to provide insights into a business's customers, interactions, and operations.

Our integration enables you to embed BeInContact's Agent Desktop widget into your Dynamics 365 environment to get full call and chat capability in your CRM operations. In addition, integration allows contact center users, such as supervisors, to use Dynamics 365 data in contact center operations via a separate, pop-out Agent Desktop.

BeInContact, you can engage with Dynamics 365 customers on their channel of choice, whether it's voice, web chat, email, video, SMS, or social messaging, while gaining insights on customer behavior and tracking all interactions in context in activity history. The integration with the Dynamics 365 web client is powered by Microsoft's Web API for Dynamics 365 for Customer Engagement apps (version 9.x). A RESTful API, the Web API enables you to interact with Dynamics 365 data for Customer Engagement apps using various platforms, programming languages, and devices.

## 100% Cloud - Customer Experience Platform

Through the integration, you can access and use Dynamics365 data in your BelnConatct Contact Center operations, providing comprehensive customer service to your existing contacts.

Our integration enables you to embed BelnContact AgentDesktop widget into your Dynamics 365 environment to get full call and chat capability in your CRM operations. In addition, integration allows contact center users, such as supervisors, to use Dynamics 365 data in contact center operations via a separate, pop-out Agent Desktop.

### Full list of features:

- Single sign-on with Microsoft Azure using SAML 2.0
- Screen pop data objects to agents
- Transfer screen with transfer
- Switch screen contents when switching between conversations
- Click-to-dial functionality
- Ability to associate objects with the conversation
- Activity history
- Play recordings from within activity history
- Automatic contact identification and contact creation via Dynamics 365 data
- Dynamics 365 records management via scenarios
  - Create new objects
  - Update objects
  - Delete objects
  - Search objects
  - Screen-pop objects
- Embedded Agent Desktop widget in Dynamics 365 environment
- Direct access to Dynamics 365 data via Microsoft Web API

## How integration works

Microsoft Dynamics CRM integration helps agents personalize calls using CTI screen pops and more. Identify callers by unique attributes, like phone number, and display information, such as the caller's name, on the agent's screen before the call connects.

**BROWSER:** Google Chrome, Firefox, Edge o Safari

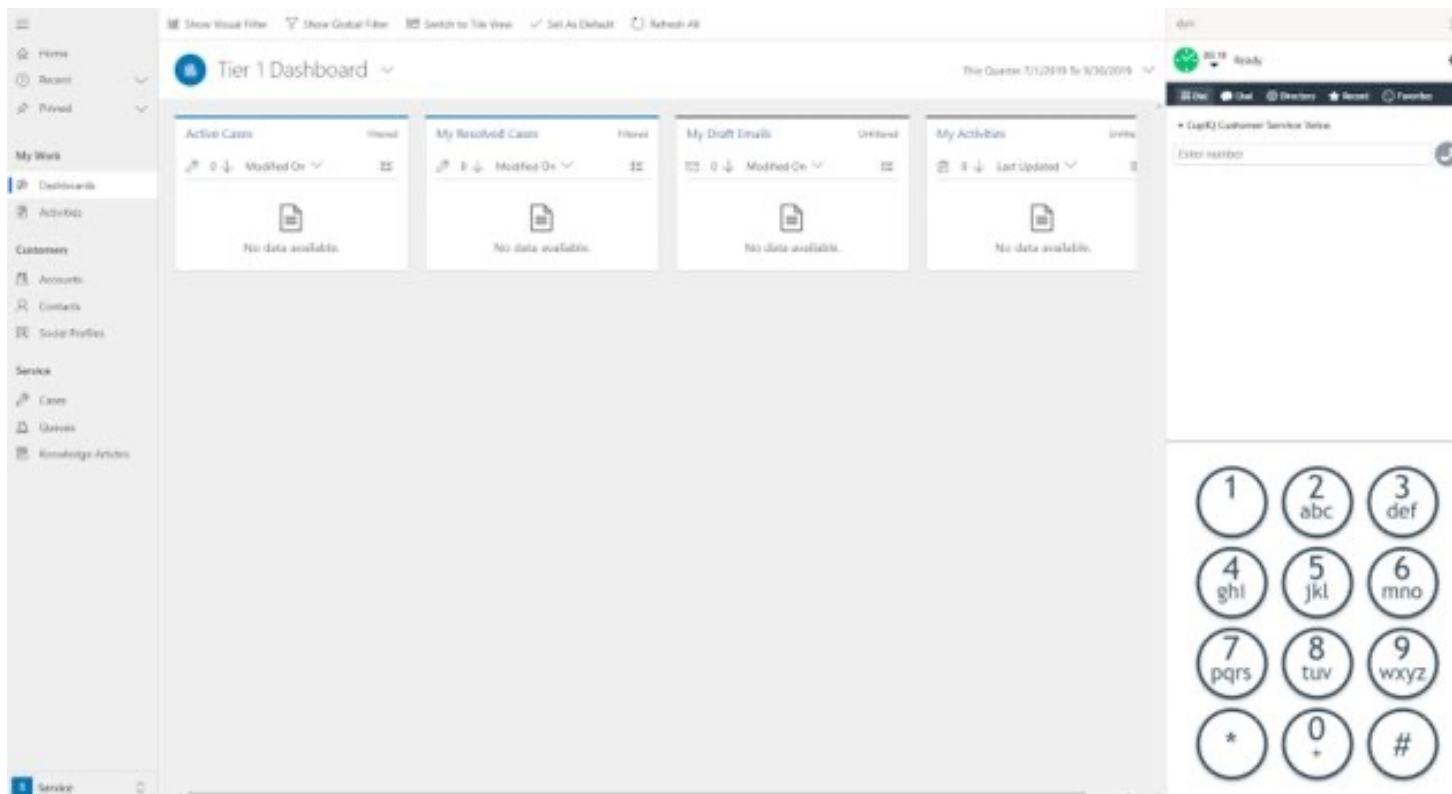

**PHONE:** Softphone embedded to the platform, WebRTC or IP phone or external phone on PSTN line

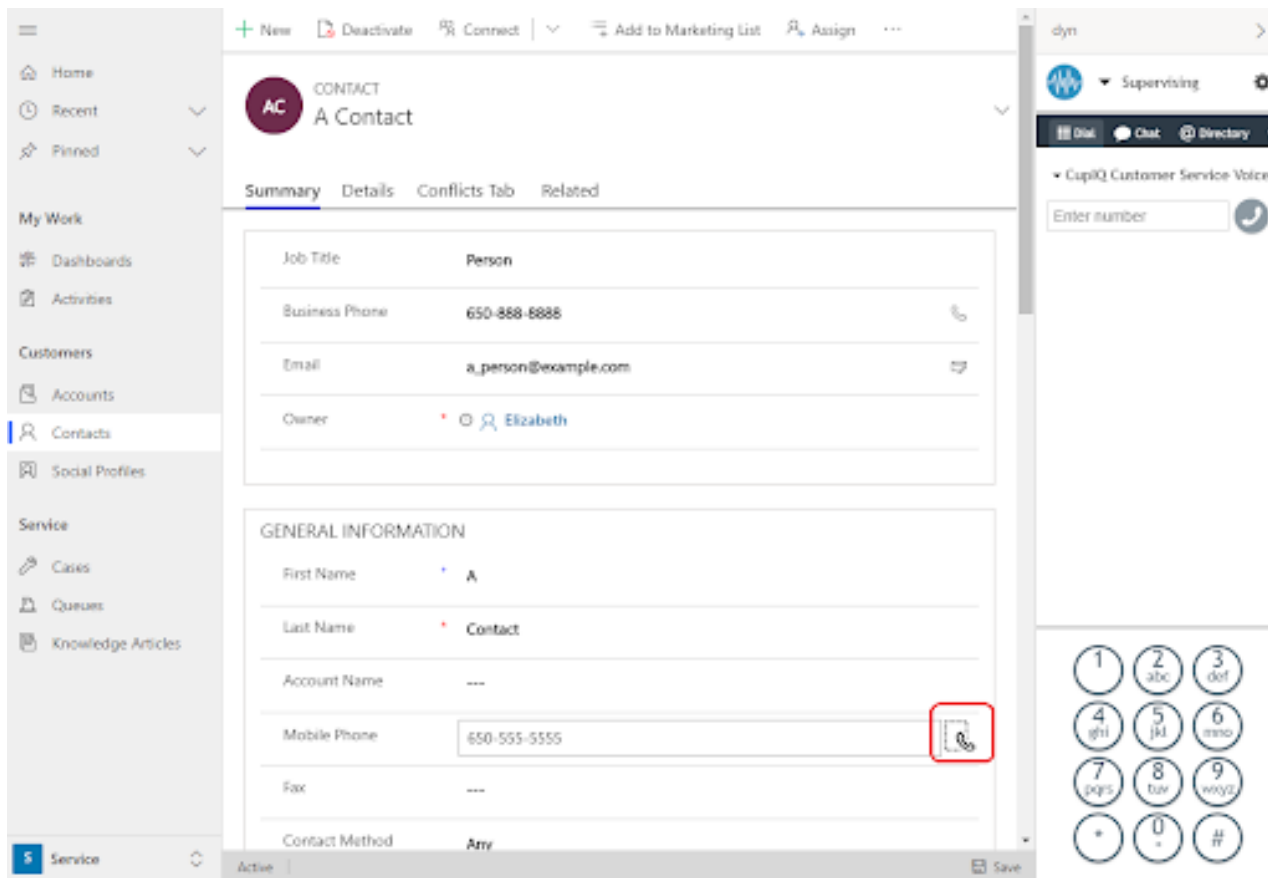

**CHAT:** Web Chat, SMS, **WhatsApp Business**, **Microsoft Teams**

**SINGLE SIGN ON:** Login to BeInContact in one-single-step

## How integration works

The screenshot displays the BeInContact user interface. On the left is a sidebar with navigation options: Home, Recent, Pinned, My Work, Dashboards, Activities, Customers, Accounts, Contacts (highlighted), Social Profiles, Service, Cases, Queues, and Knowledge Articles. The main area shows a contact profile for 'A Contact'. The profile includes a summary section with fields for Job Title (Person), Business Phone (650-888-6888), Email (a\_person@example.com), and Owner (Elizabeth). Below this is a 'GENERAL INFORMATION' section with fields for First Name (A), Last Name (Contact), Account Name, Mobile Phone (650-555-5555), Fax, and Contact Method (Any). A red box highlights a small icon in the Mobile Phone field. On the right side of the interface, there is a 'dyn' panel with a 'Supervising' section and a 'Cupix Customer Service Voice' section with an 'Enter number' input field. At the bottom right, there is a numeric keypad with buttons for digits 1-9, \*, 0, and #.

### IDENTIFICATION

Identify the caller on variables such as phone number, houses, fields and prioritize them based on their data.

### SELF-SERVICE & AUTOMAZIONE

Create automatic cases for after hour or voicemail calls, read, update or delete cases following a call or chat interaction.

### AUTOMATIC SYNCHRONIZATION OF LISTS

Profiles lists in Dynamics to set up a campaign and filters the fields, importing the content automatically into BelnContact.

### PREDICTIVE, PROGRESSIVE OR PREVIEW DIALER

Use different methods of automatic dialing in accordance with business needs.

### UNIFIED SUPERVISION

See the status of operators and monitor calls in real-time.

### SINGLE SIGN ON

Automatically log in to BelnContact after logging in to Microsoft Dynamics.

## Step & Item

### 1. Add a new registered App

Adding a new registered App allows the Microsoft Azure Active Directory to communicate to BelnContact Software via Dynamics 365. This step enables the integration of scenarios.

### 2. Install Channel Integration Framework App

Sign in to your Dynamics 365 instance.

### 3. Install BelnContact Omnichannel Solution

Once the Channel Integration Framework App is installed and configured, you can install the BelnContact Contact Center and Microsoft Dynamics 365.

The screenshot displays the Microsoft Dynamics 365 user interface. On the left is a navigation pane with options like Home, Recent, Pinned, My Work, Dashboards, Activities, Customers, Accounts, Contacts, Social Profiles, Service, Cases, Queues, and Knowledge Articles. The main area shows a contact record for "Kitty Sanchez" with a green profile icon. The record includes tabs for Summary, Details, Conflicts Tab, and Related. The "Summary" tab is active, showing "GENERAL INFORMATION" with fields for First Name (Kitty), Last Name (Sanchez), Account Name, Mobile Phone (16506848961), Fax (16508888888), Contact Method (Any), and Address 1 (Street 1, Street 2, Street 3, City). To the right of the general information is a "TIMELINE" section with a "Timeline" header and a "Timeline" entry: "Auto-post on wall Kitty Sanchez - Wednesday, August 28, 2019 9:39 AM". Below the timeline is a "CuplQ Dynamics Preview" window showing the contact's name and phone number (650) 684-8961, with "Accept" and "Reject" buttons. On the far right is a chat window for "Kitty Sanchez" with a status bar showing "00:06 Busy Next: Ready" and a "report a call problem" link. Below the chat window is a numeric keypad with buttons for digits 1-9, \*, 0, and #.

Only 22% of companies have a platform that allows them to **integrate** channels and have all customer data **available in real time.**

## SUPPORT AND ASSISTANCE

We deliver our services through an operational technical support team, providing Italian and English-speaking technicians, geolocated in Italy, available for remote or on-site and in-person support, depending on the type of intervention required by the customer.

All communications with the BeCloud Solutions technical support team, are conveyed through a ticketing system that will be provided to the customer from the time of GO-Live of the services.

## REVIEWS FROM SOME OF OUR CUSTOMERS

### COMER SUD

*"I really appreciated the ease of omnichannel connection with the customer. The flexibility of the tool to integrate with and third-party software, and the ability to configure the experience according to the needs of the organization. The use of BelnContact was intuitive from the beginning, thanks to the help of the Support Team who was quick and attentive to our business needs."*

**Simona Frisella Vella**

D-Service Business Unit Manager

### Prysmian Group

*"The solution has brought many advantages to our group: operating in multiple locations and markets, the whole process of Customer Centricity is unique and reported in a single point of information collection. BeCloud Solutions has proven to be a reliable partner and available in all project phases such as design, delivery and above all post-live, supporting operating and business in the phase of change management and, most importantly, adoption."*

**Andrea Barba**

IT Solution Delivery Manager

*"At E80 Group, listening to the customers is a main pillar. The primary goal is to offer them 360° services with innovative, intuitive and easy-to-implement solutions. Thanks to the partnership with BeCloud Solutions we improved the level of Customer Satisfaction and increased, at the same time, the contact rate. We believe that the synergy and the big teamwork carries an added value not only to our customers, but also to ourselves, improving moments of learning and continuing the Customer Service innovation."*

**Roberto Sansiveri**

IT Software Manager
