META ADS

The collage illustrates various digital touchpoints for customer interaction:

- Website:** A screenshot of the Farmacie Italiane website showing a "Contact us" section with a WhatsApp link: <https://wa.me/123456789>. Below it, a section titled "Vigiliamo insieme sulla tua salute" encourages users to book appointments.
- WhatsApp Business Post:** A screenshot of a WhatsApp Business post from BeCloud, dated November 8, 2022, at 09:39. The post discusses the benefits of WhatsApp for business in the pharmaceutical market and mentions Farmacie Italiane's use of BeCloud's platform.
- Car Advertisement:** A screenshot of a car advertisement for "COMER SUD" featuring two Mercedes-Benz GLE models. The ad includes a QR code and the text "For more information Chat with us".
- Facebook Messenger Chat:** A screenshot of a Facebook Messenger chat window for "BeCloudSolutions". It shows a "send a message" button and a "MESSANGER BeCloudSolutions" header.

Outbound campaign template

Companies can use WhatsApp for Business to run three types of Outbound Campaigns: Utility, Authentication, and Marketing.

With our experience, we can support you every step of the way — from getting your personalised messages approved to sending templates to your customers.

Utility

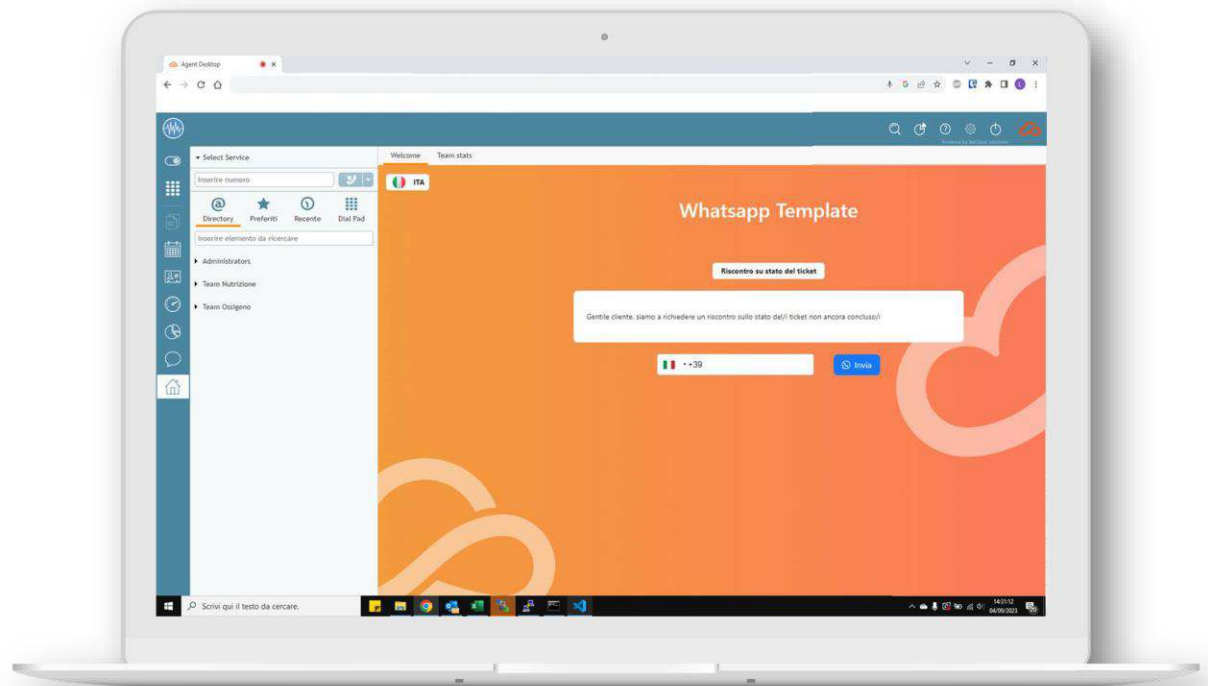

Assist customers with specific requests or transactions by providing updates on ongoing activities, sending notifications, post-purchase messages, or recurring account statements.

Authentication

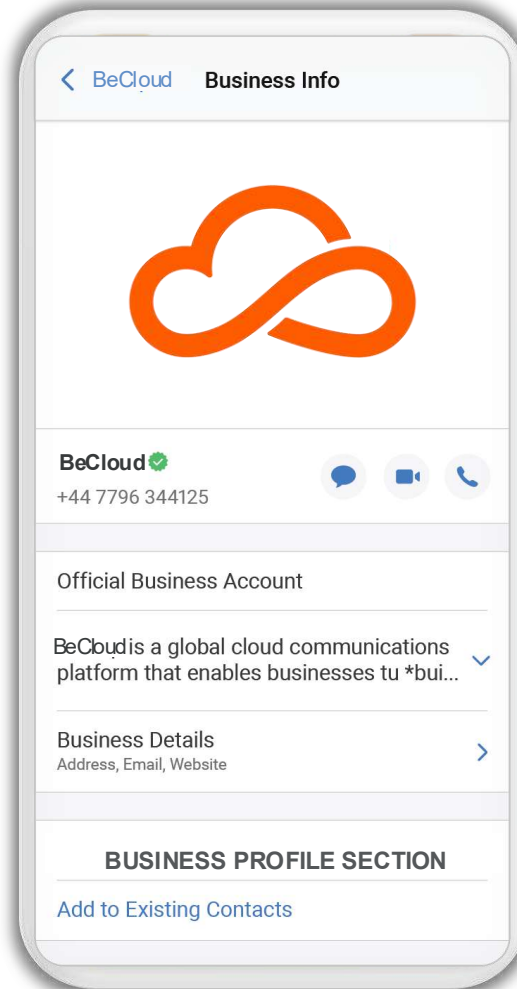

Send verification codes, one-time passwords (OTP), or secure links to authenticate the user's identity during login, registration, or sensitive transactions.

Marketing

Promote products, special offers, or personalised events through engaging messages aimed at increasing brand awareness and driving sales.

Chat and conversations one-to-one

Verified sender
Branded communication

Encrypted messages
Your messages are protected with the best end-to-end encryption system.

Two- Way communication
Receive questions, offer support

Media
Enhance communication with your end users through images, documents, contact sharing, location, and videos.

"Read" status
Check when a message has been viewed by the recipient.

RCS overview

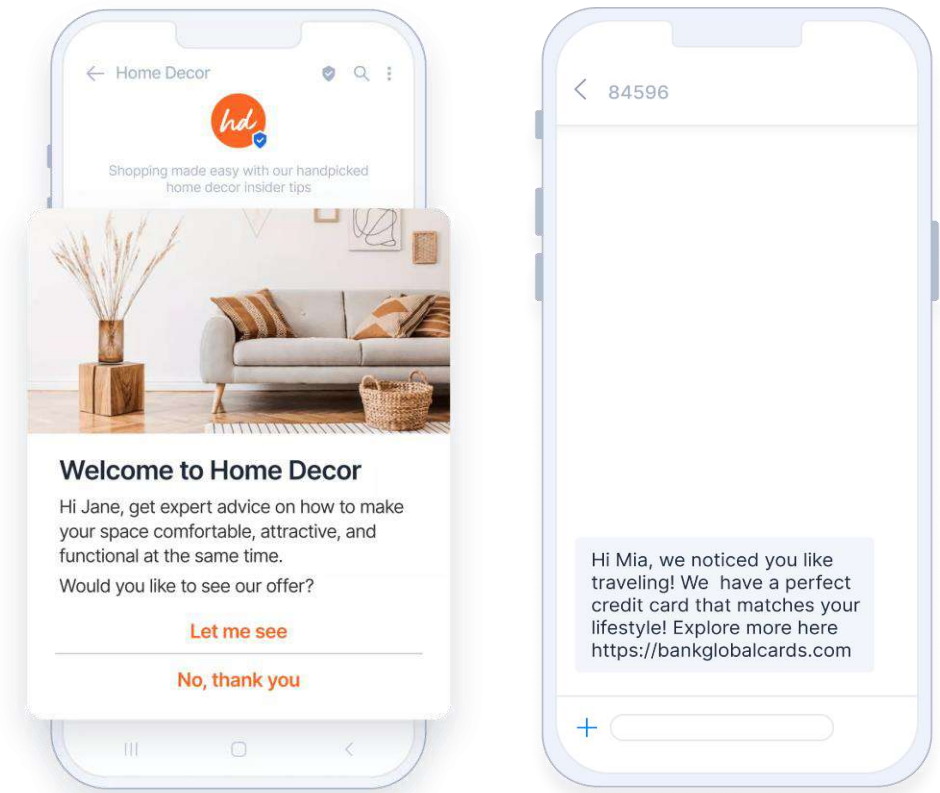

RCS (Rich Communication Services) messages offer a richer messaging experience compared to traditional SMS. RCS messages represent an evolution of text messaging by integrating advanced features that make them similar to messaging services like WhatsApp or iMessage.

The main goals include:

- **Supporting businesses in marketing and customer service:** Companies can use RCS messages to engage more effectively with customers by sending rich content such as images, videos, carousels, interactive links, and even integrating a chatbot.
- **Unifying messaging across platforms:** The goal is to provide a seamless and consistent communication experience across all devices and carriers.
- **Improving security:** RCS aims to deliver secure communication with encryption support, offering greater protection of personal data compared to SMS.

By sending RCS you can:

- Leverage the wide reach of SMS
- Go beyond plain text by adding images, carousels, and call-to-action buttons
- Protect your brand from fraud and phishing by sending messages from a certified, recognizable Agent (sender)

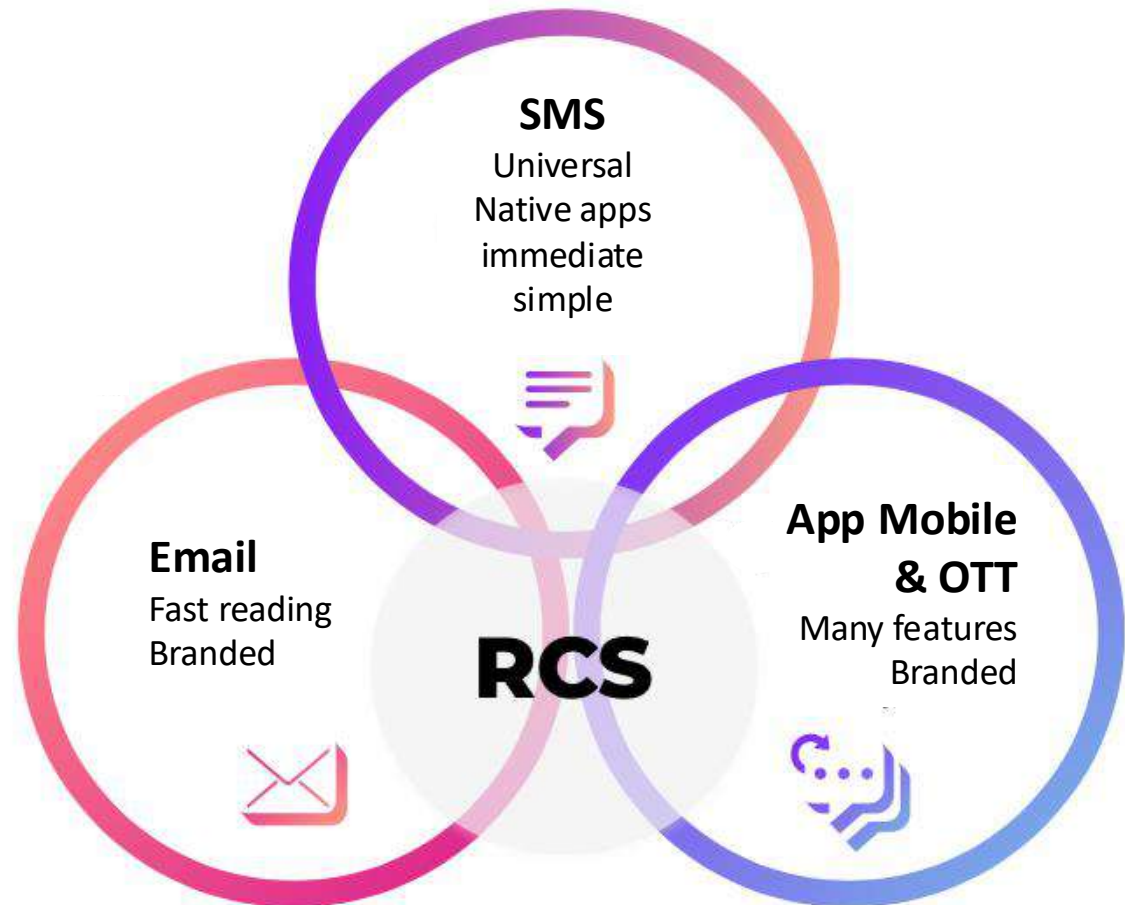

RCS: SMS, mail, App Mobile & OTT

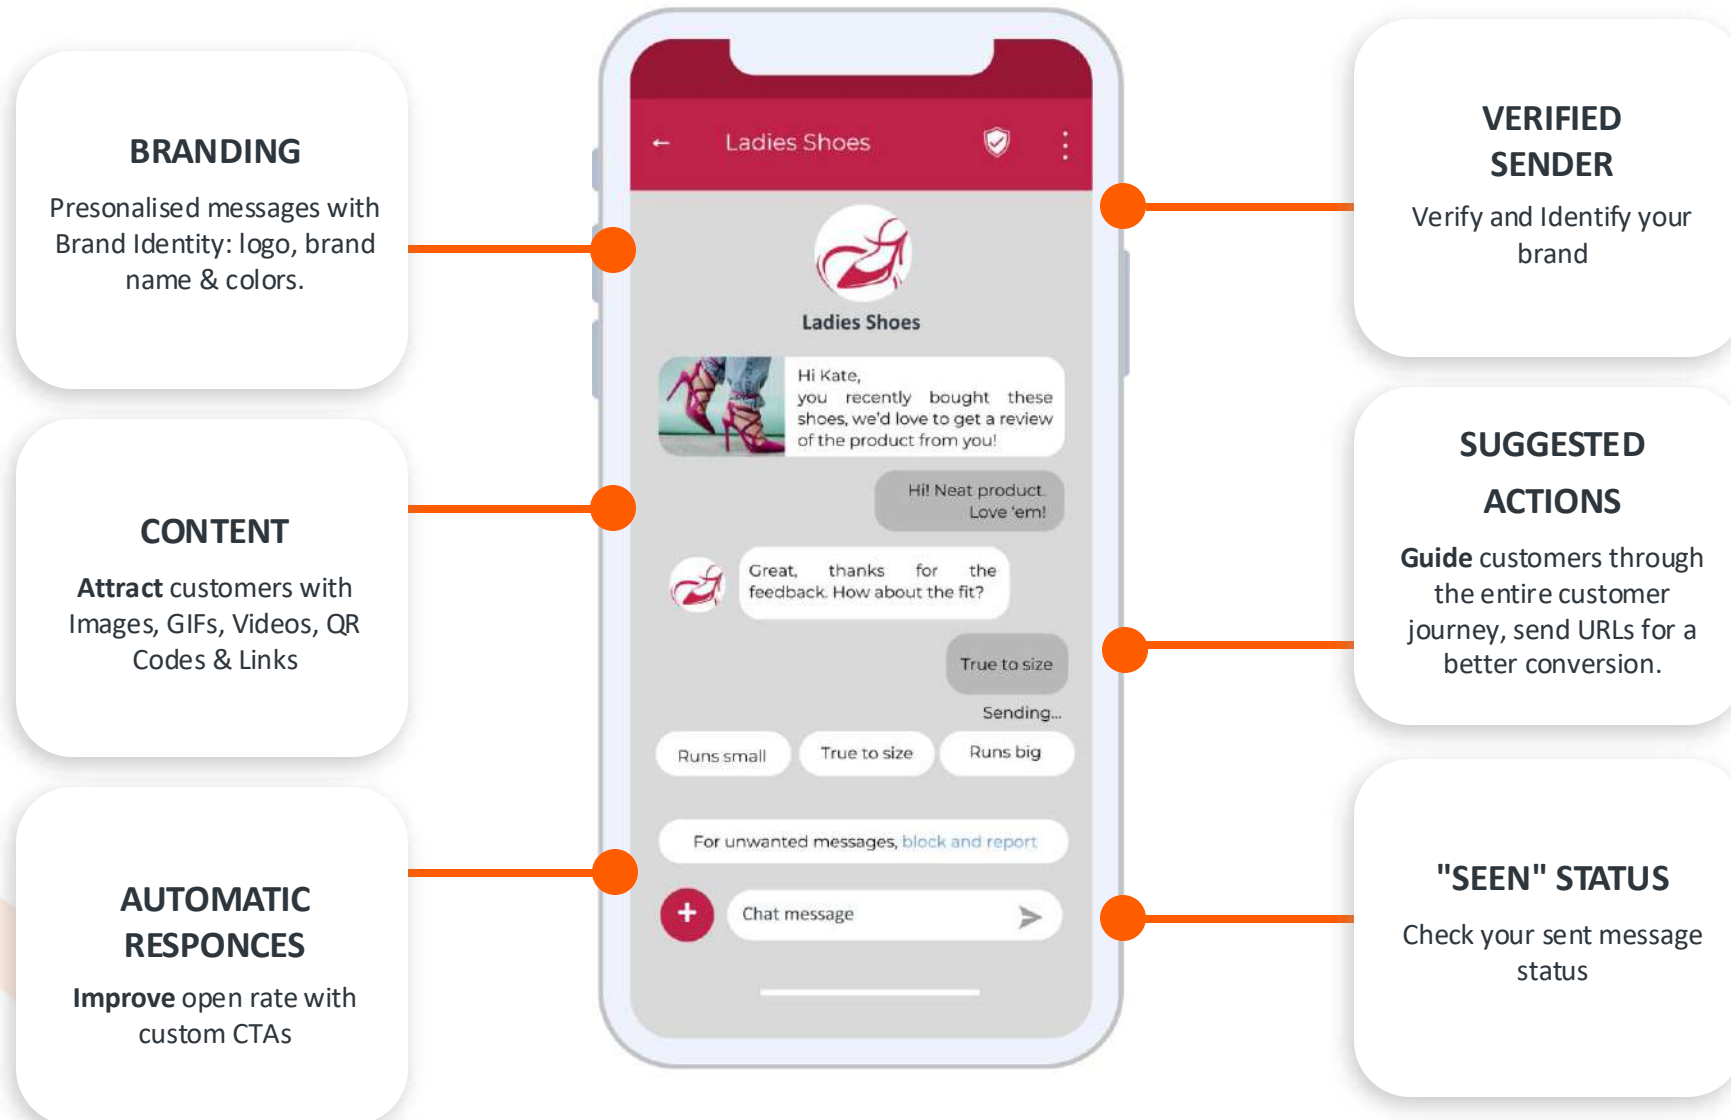

One single communication channel

An effective communication, in order to stand out from the multitude of branded messages that bombard customers daily, must be:

- Personalised based on customer experiences.
- Contain contextually relevant messages.
- Capable of creating an authentic and personalised interaction.

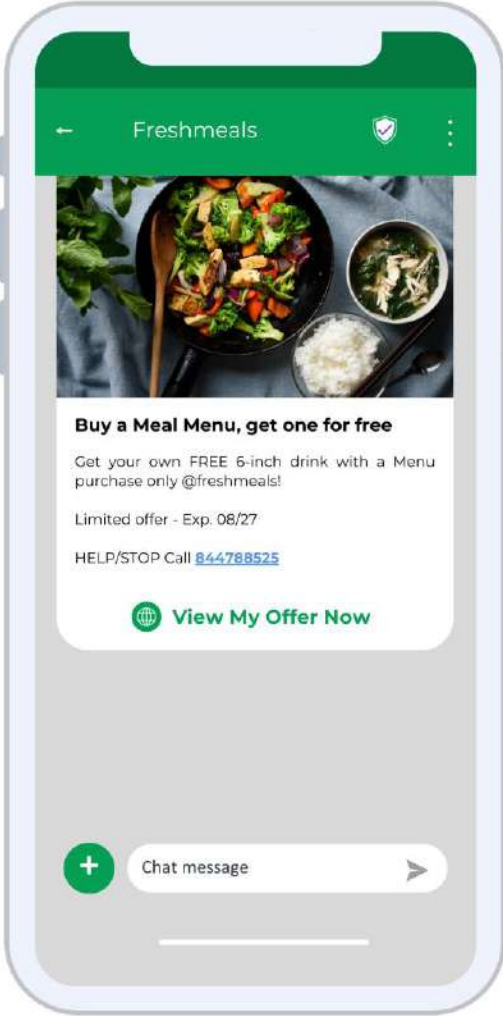

Personalise all aspects of your messages

Concierge
services

RCS features

IP BASES

Customers need an active internet connection

MULTIMEDIA MESSAGES

RCS allows high quality foto, video & audio sharing, surpassing SMS size limit

AVAILABLE ON IOS & ANDROID

Supported on every Android device (7.0 or higher) & IOS (18 or higher)

NOTIFICATIONS

Users can see if their message has been read and whether the other person is typing a response—features similar to those offered by apps like WhatsApp and Messenger.

SMS FALLBACK

If the recipient's carrier or device does not support RCS, the message will be sent as a standard SMS.

INTERACTIVE INTERFACE

Users can interact with bots and business services directly within the chat, making transactions and customer service more seamless and efficient.

INTEGRATIONS

RCS can integrate with other applications to enhance functionality, such as appointment scheduling or sending delivery updates.

CHAT DI GRUPPO

Users can create group chats with a larger number of participants compared to SMS, making it easier to communicate with multiple people at once.
