Integrate  
your own CRM

# AI Transcription

## *From audio to text*

Scattered information. Slow analysis. Decisions made with incomplete data? Meetings, calls, and customer service generate massive volumes of voice data no team can manage manually?

Time for a change.

Say hello to **AI Transcription**.

- Instantly convert audio and video into CRM-ready text.
- Turn every interaction into clear, actionable insight.
- Cut operational time dramatically.
- Simplify content analysis.
- Let your agents to focus on what *really* matters

Less complexity, more efficiency.  
Every word *really* counts.

# AI Transcription

## *Why it really matters*

AI Transcription boosts customer service efficiency by allowing you to:

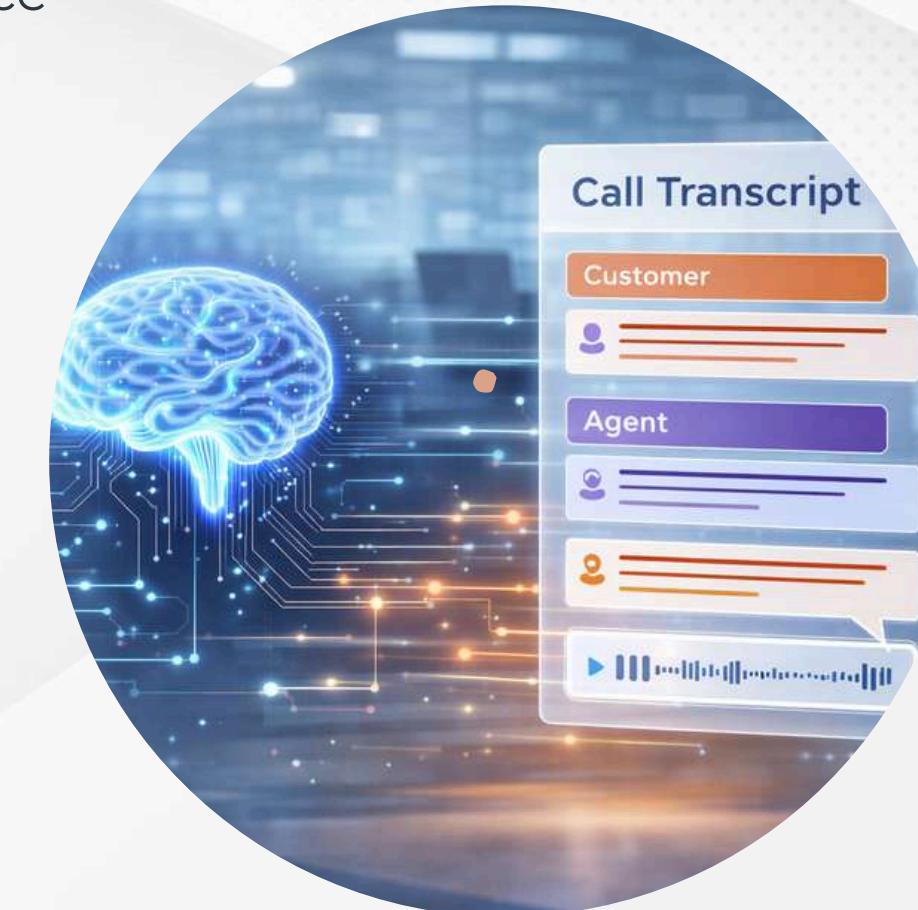

Store recordings in a searchable format

Identify keywords

Create clear, concise meeting summaries

Improve customer service performances

Streamline agents' work

# AI Transcription

## *In customer service*

AI Transcription transforms processes across industries by converting calls and digital interactions into actionable insights. With a cloud platform fully integrated with channels and CRM, agents handle everything from a single interface and access data instantly.

- Interactions & preferences analysis
- An optimised Omnichannel experience
- Empower agents and operators with actionable data
- Cut management time through automation
- Improve support through analysis
