CTI integration with **SERVICENOW**

CTI integration with ServiceNOW

Grazie all'implementazione della CTI Phone Bar all'interno del layout di Servicenow è possibile **gestire le comunicazioni su tutti i canali di contatto** così come consentire ad agenti e operatori di gestire le interazioni in entrata corredate da tutte le informazioni censite nel CRM .

In questo modo, gli agenti di Servicenow, sono in grado utilizzando il solo widget del CTI di BeInContact, di gestire in un'unica interfaccia utente tutti i canali di contatto configurati; l'integrazione a Servicenow permette di avere a schermo tutte le informazioni del cliente, ottimizzando e semplificando così le operations quotidiane.

Browser

Google Chrome, Firefox, Edge o Safari

Phone

Softphone embedded to the platform, IP Softphone, or PSTN line

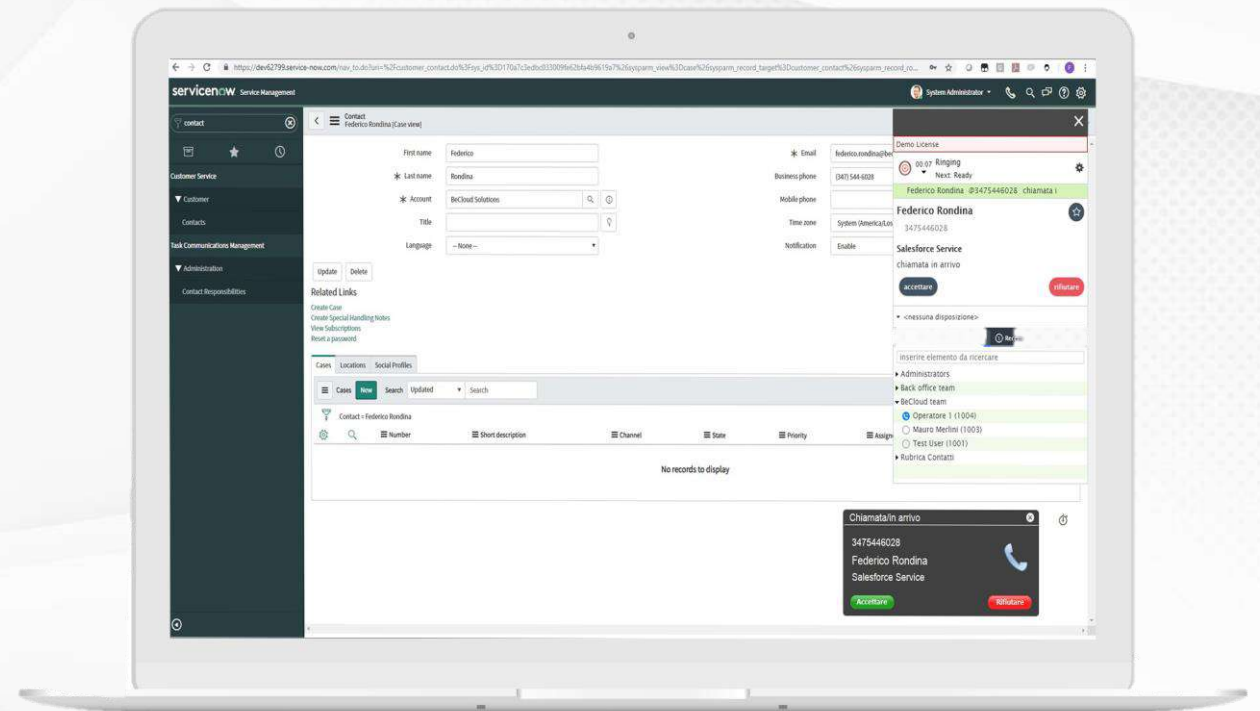

Chat

Webchat, SMS, WhatsApp Business, Microsoft Teams

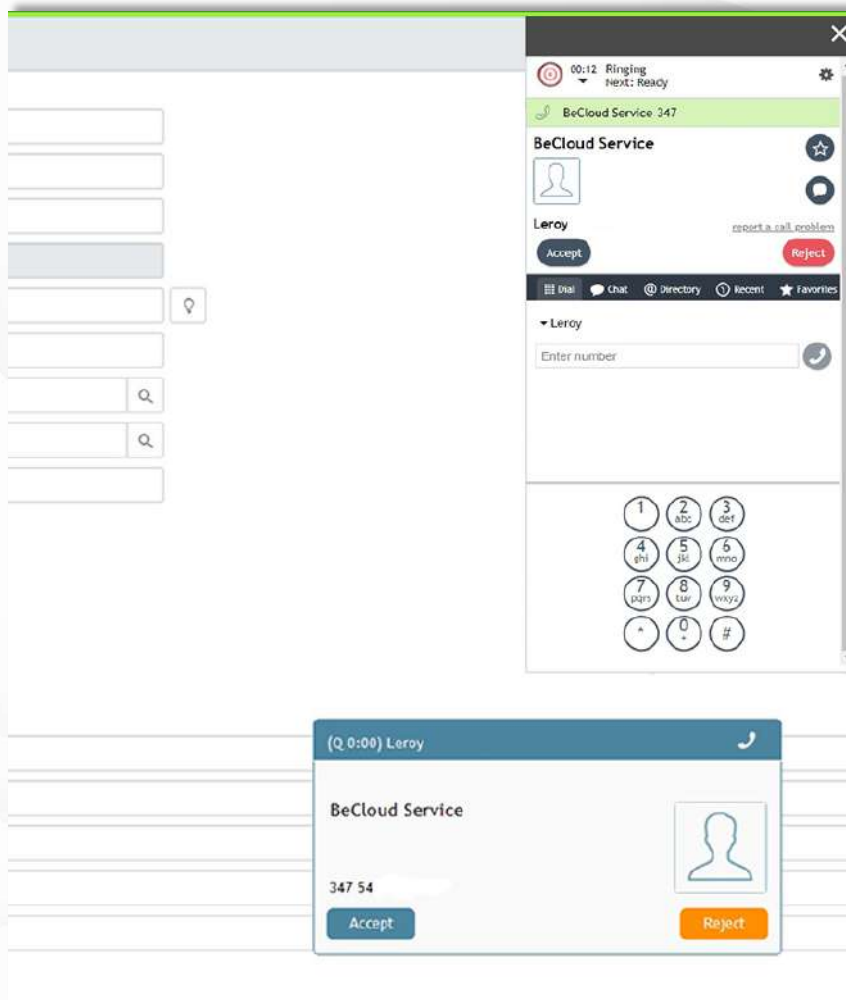

Single Sign On

BeInContact single sign on

Integrazione con ServiceNOW

Some features

Identification & Screenpop

Identify the caller based on variables such as phone number, incidents, and fields, and assign them a priority according to the data.

Self Service & Automation

Automatically create tickets for after-hours calls or voicemail, and read, update, or delete cases after a call or chat interaction.

Automatic list sync

Profile lists in Salesforce to configure a campaign and filter fields, automatically importing the content into BelnContact.

Predictive, Progressive, Preview dialer

Use different automatic dialling methods based on business needs.

Unified supervision

Operator status display and real-time call monitoring.
